

PROJECT COMPLETION LETTER

Dear Mohamed Hussein Ragab

I am pleased to announce the successful completion and deployment of the following projects:

- ♦ **Hotel Reservation Classification**

- This project covered the entire end-to-end process, starting from exploratory data analysis (EDA), progressing through model development, and concluding with deployment using Flask. It emphasized extracting, interpreting and presenting meaningful insights in a clear. It strengthened teamwork and presentation skills.

- ♦ **Uber Fare Prediction**

- This project for Uber involved end-to-end development, from EDA to model deployment using Django. It tackled large, complex datasets with various challenges, applying effective data handling techniques. Additionally, it strengthened business understanding, data interpretation, teamwork, and presentation skills.

The completion and deployment of these projects demonstrate our commitment to advancing technology and providing solutions that address real-world challenges. We are proud of the outcomes and the valuable insights gained throughout the process.

Sincerely,

Ahmed Sameh
